

Simple set up
700m/min
Quick release

Cold perforation technology

PML manufacture a range of micro perforation machines and supply custom pinned tooling for existing machines.

Cold needle micro perforation machines are specifically designed to perforate any substrate with a raised surface on either side of the material. Perforations can be either a continuous pattern or registered.

- Features**
- Latest hole technology
 - Quick release mechanism
 - Accurate pin penetration control
 - Simple set up procedure
 - High speed design
 - Pressure roller to suit application
 - Optional drive system

Perforation machinery Ltd have developed perforating solutions for a wide range of applications.

- Hygiene and medical industries
- Packaging industry
- Filling of powder materials
- Tape manufacturers
- Moisture, vapour or air flow control materials

Let us help you with our innovative approach to perforation engineering...
